

MANAGEMENT INCUBATOR

NOW MORE THAN EVER, DEVELOPING EMERGING LEADERS OF TODAY – AND TOMORROW – IS CRITICAL TO MAINTAINING A DYNAMIC WORKFORCE THAT NOT ONLY HELPS DRIVE YOUR BUSINESS – BUT ALSO HELPS ENGAGE YOUR PEOPLE.

Success Labs' Management Incubator helps up-and-coming young professionals and soon-to-be or recently promoted supervisors gain a deeper understanding of what it means to influence, manage stakeholder relationships and lead teams. **Featuring a series of interactive workshops, one-on-one coaching and development planning**, this experience has proven to be both educational – *and impactful* – for early career learners of all levels, industries and professions. In addition to a high-touch training experience, we use a structured and action-oriented approach to development. Each participant will receive three individual coaching sessions that includes insight from a 360 Feedback Report and focused individual professional development plan to achieve results.

Emerging leaders will gain a clear understanding of their natural tendencies and preferences, leadership and communication styles as well as their strengths, challenge areas and next level development needs. Using a combination of hands-on activities, classroom learning and group discussions, participants will then learn how to use that knowledge to their advantage and develop ways to maintain a professional presence, manage former peers and conflict, problem solve to find solutions, and have influence and impact as a new or emerging leader.

FOCUSING ON CORE SKILLS TO DEVELOP:

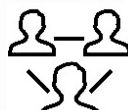

- YOUNG PROFESSIONALS
- EMERGING LEADERS
- SOON-TO-BE & RECENTLY PROMOTED SUPERVISORS
